

Eero Isola

Bachelor of Engineering - Information Technology

Profile

I am a soon-to-graduate developer who specializes in AI, server and tools development.

My goal is to find real use cases of modern AI capabilities and to design for the world in the future.

Work experience & Education

Work experience ●
Safe Payment Group Oy
03.2026 - ongoing (contract work)

Full Stack development on payment middleman app on React, Node and AWS.

Work experience ●
Growth Rocket
12.2025 - ongoing

I am responsible for building and maintaining a Wordpress site and developing a custom plugins. I also migrated the whole site out of the expensive contract and in to the docker framework, saving a 60% of monthly upkeep costs.

Work experience ●
Sitting member of local municipal audit committee 2025 - ongoing

As a committee member, I am responsible for overseeing the financial reporting process.

Work experience ●
Basaari.com website
- 2025 Spring

I built a web store with Shopify, integrated the TCGPowerTools inventory management system, and configured the server.

Work experience ●
happydaysmantsala.fi server
- 2024 Autumn

I configured the server and domain for the local hobby group while my fellow student made a website.

Education ●
LAB university of applied sciences
2022 - On going,
Information Technology,

Bachelor of Engineering
- Expected graduation 06.2026
